BPA,

I am writing this letter in regards to the funding cutbacks for our local watershed projects.

The past few years I have had the Conservation District help me design, implement, and fund several projects on my ranch.

These include off site watering ~~&~~ and fencing to keep livestock out of the streams. also waste management facilities to better control runoff and waste removal.

Without ~~the~~ costsharing on these projects they would not have gotten done.

Please continue your support there is much more to do.

Thank You

Phil W Heitstuman
