

A Multi-Species Framework Approach for the Columbia River Basin

Integrating Fish, Wildlife, and Ecological Functions

Version: February 2002

AUTHORS AND ACKNOWLEDGEMENTS

Bruce G. Marcot, Ph.D., Research Wildlife Ecologist, USDA Forest Service, Pacific Northwest Research Station, 1221 S.W. Yamhill St., Portland, OR 97208-3890, bmarcot@fs.fed.us

Willis E. McConnaha, M.S., Fisheries Biologist, Northwest Power Planning Council, 851 SW 6th Ave. Suite 1100, Portland, OR 97204. cmcconnaha@nwppc.org

Paul H. Whitney, Ph.D., Senior Ecologist, Beak Consultants Inc., 317 S.W. Alder St., Portland, OR 97204-3820, pwhitney@beak.com

Thomas A. O'Neil, M.S., Wildlife Ecologist, Northwest Habitat Institute, P.O. Box 855, Corvallis, OR 97339-0855, habitat@nwhi.org

Peter J. Paquet, Ph.D., Manager, Wildlife & Resident Fish, Northwest Power Planning Council, 851 SW Sixth Avenue, Suite 1100, Portland OR 97204, ppaquet@nwppc.org

Lars E. Mobernd, Ph.D., Biometrician, Mobernd Biometrics, Inc., PO Box 724, Vashon, WA 98070, lars@mobernd.com

Gregory R. Blair, M.S., Fisheries Biologist, Mobernd Biometrics, Inc., PO Box 724, Vashon, WA 98070, gblair@mobernd.com

Lawrence C. Lestelle, M.S., Fisheries Biologist, Mobernd Biometrics, Inc., PO Box 724, Vashon, WA 98070, lestelle@tscnet.com

Kevin M. Malone, M.S., Biologist, Mobernd Biometrics, Inc., PO Box 724, Vashon, WA 98070, kmalone@mobernd.com

Technical Editor:

Kristina I. Jenkins, Editor/Production Manager, Northwest Power Planning Council, 851 SW Sixth Avenue, Suite 1100, Portland, Oregon 97204 - kjenkins@nwppc.org

Willis E. McConnaha and Peter J. Paquet wrote the sections on fish methods and results. Lars E. Mobernd, Gregory R. Blair, Lawrence C. Lestelle, and Kevin M. Malone conducted and supported the fish modeling and contributed to the fish text. Bruce G. Marcot, Paul H. Whitney, Thomas A. O'Neil, and Peter J. Paquet wrote the sections on wildlife and integrated fish-wildlife methods and results, and conducted the modeling of wildlife and fish-wildlife interactions. Bruce G. Marcot did overall editing of content and wrote the introduction and summary sections. Kristina I. Jenkins compiled the manuscript, provided technical edits, and created the PDF file version.

ACKNOWLEDGMENTS

We thank the following people for their technical and/or administrative contributions: Charley Barrett, Steve Berwick, David Johnson, Chris Kiilsgaard, Rick Paquette, Drew Parkin, Roy Sampsel, and Lance Vail. We also thank members of the Ecological Working Group, including Peter Bisson, Chris Frissell, William Liss, Jim Lichatowich, and Cindy Williams; and the members of the Framework Steering Committee, including Tom Cooney, Albert Georgi, and Phil Rogers. Thanks to Stephen Sasser and Eric Schrepel for their help with editing and production.

TABLE OF CONTENTS

I. Summary

Overview

Results of Fish Assessments

Results of Wildlife Assessments

Results of Fish-Wildlife Assessments

Findings Related to Scientific Uncertainty and Potential Management Risk

Recommendations on a Research, Monitoring, and Evaluation Program

II. Introduction

History and Background

Objectives

Toward Integrated Assessment and Management

Sections of this Report

III. Methods

Fish Species

Introduction

Development of Current Potential and Historic Potential Landscapes

Analysis Method

Uncertainty and World View Assumptions

Wildlife Species

Introduction

Overview of Information Used

Major Assumptions

Validation Steps

Ecological Integration

Integrating Assessments of Fish and Wildlife Populations and Ecological Functions

- Influence of Habitats on Populations and Functions

- Influence of Populations on Themselves

- Influence of Populations on Other Populations

- Influence of Populations on Habitats and KECs

- Influence of Planning Alternatives and Management Activities on Habitats

- Changes Through Space and Time

Addressing Uncertainty

- Uncertainty and Use of a Scientific Approach

- Uncertainty as Handled in This Report

- Worldviews

IV. Results and Discussion

Fish

- Framework

- EDT Model Results Validation

- Historic Potential

- Current Potential

- Alternative 2

- Alternative 5

- Alternative 6

Wildlife

- Habitat Performance

- Biological Performance

Fish and Wildlife Integration

- Integrated Assessments of Fish and Wildlife Populations and Ecological Functions

- Influence of Habitats on Populations and Functions

- Influence of Populations on Themselves

- Influence of Populations on Other Populations

Influence of Populations on Habitats and KECs

Implications of Findings

V. Research, Monitoring, and Evaluation

Conceptual Overview with Example

Three Levels of Monitoring

Role of Independent Science Advisory Board

Discussion and Elaboration on the Use of Biological Objectives
