Subject: Public Interest Proposal

Dear Mr. Stephen Wright,

Please seriously consider adopting the Public Interest Proposal as BPA's mandate for future energy endeavors. As a representative for the largest energy marketer in the region, it behooves you to recommend the most responsible approach to energy management. The benefits of reducing our dependence on foreign oil and increasing our investment in renewable fuels are clear and critical: improving national and global security, protecting our environment, improving our local energy generating economy.

Please make the right choice and help to continue to lead the nation by example on how to manage our resources for the greater good.

Gratefully yours,
Peter Farrelly
