Subject: My input

Dear Administrator Wright,

At the risk of sounding like a hundred other emails you have already entertained, I would like it known that I support a clean energy future for our region (which would include plentiful wild salmon, clean, renewable energy, and a healthy economy). My understanding is that the Bonneville Power Administration (BPA) is currently weighing proposals to change the way it distributes power from federal dams on the Columbia and Snake rivers, which will have strong impacts on salmon and salmon dependent communities.

I urge you and the BPA to ensure that any plans to change its power supply role include measures to improve the conditions facing wild salmon and increase investments in clean, renewable energy.

We need forward thinking leadership to restore endangered salmon and promote clean energy.

As BPA considers its role in our region, please take care to promote a Northwest future that includes abundant wild salmon, clean energy and a strong economy.

Thank you,

Evan D. Franulovich
