Subject: HEARINGS-CONTRACTS

To Bonneville Power Administration hearings:

Sorry, I shan't be at any of your hearings as I have moved "home" to assisted living in North Dakota, but with friends and future heirs in State of Washington, may I go on record as one more concerned person that:

(1) In sale of electricity produced by Snake and Columbia River dams, consider our PNW needs first.

(2) Promote and maybe help finance improvements to dams to enable the passage of all, if possible, wild salmon to pass through dams,

(3) I liked the weatherization of homes to conserve electricity, but maybe we should move up to include persons of moderate as well as low incomes...even if persons can pay for the electricity they use, give them incentive to conserve.

(4) Can BPA, besides selling electricity from its dams, enter into the incentive programs for farmers to make a profit on oil seed crops that will be processed into bio-fuels for generation of electricity, as another source for electricity???

Hang in There BPA, we need you!
