Subject: We Need Clean Energy and Wild Salmon!

Steve Wright
BPA Administrator
PO Box 12999
Portland,OR 97208

Dear Mr. Wright:

Please accept my support to the BPA for the Public Interest Proposal for wild salmon and clean energy.

I believe we need protection for our future, and this includes the preservation of the remaining wild salmon via clean, affordable energy sources and production. During the BPA's decision making on how much money gets committed to renewable energy, conservation and saving wild salmon and steelhead in the Columbia and Snake rivers for the next 20 years, I urge to place wild fish and clean energy at the top of your priorities. I urge you to rank the quality of our environment and the progress of clean energy at the top while negotiating new contracts with utilities to determine how we handle investments in salmon restoration, renewable energy, and energy conservation.

Respectfully,

Aimee Marciniak
