Subject: FW: Public Interest Proposal

Dear Mr. Wright,

As I am unable to attend any of your upcoming hearings, I am submitting my comments via this e-mail.

I would urge you and other decision makers to implement the public interest proposal which I believe would provide the greatest protection for the public's natural resources. Wild salmon are an essential part of our ecosystem, history and culture, not to mention a wonderful food source, far superior to the farm raised product.

Please do everything in your power to make decisions which will conserve and improve the natural environment so that these threatened and endangered species populations can rebound. And please promote less destructive sources of energy such as conservation, solar and wind.

Sincerely yours,

Mary O'Farrell
