PORTLAND OR 97208

Dear Mr. Wright,

I am writing about cleaner energy and wild salmon.

RAND Corp. has reported that salmon can be "re-grown" and employment will suffer no net loss if the four Lower Snake River dams are extensively modified. The electricity "lost" can be replaced by a renewed commitment to conservation and wind power, the latter modified as necessary to avoid a possible unanticipated wildlife endangerment.

Thank you for listening.
