Comments

Asotin County PUD's main business is that of a water utility. We provide electrical service to one customer (golf course) and primarily purchase power from BPA for use in groundwater pumping. The power we purchase is wheeled through lines owned by other power utilities through a general transfer agreement.

Our conservation efforts are focused on two objectives.

1. Proper maintenance of pump motors ensure that these motors run efficiently.
2. Promoting water conservation and educating customers regarding efficient use of water. The less water used, the less electricity we need to pump groundwater.

Our opportunities for promoting energy conservation are few but we try to take advantage of these as we can.
