Mr. Bill Booth, Chairman  
Northwest Power and Conservation Council  
851 SW 6th Avenue, Suite 1100  
Portland, OR 97204

Dear Chairman Booth,

Thank you for the opportunity to comment on the proposed amendments to the Council's Fish and Wildlife Program. Northwest utilities have been working with the region for over two decades to address fish and wildlife mitigation issues, and PacifiCorp is no exception. As we look ahead, we see that the Council's program can play a vital role in the success of our ongoing mitigation efforts and provide the guidance the region needs to balance the many demands for resources to aid fish and wildlife in the region. We support the previously submitted amendment proposals from the power industry with emphasis on the following points.

The program that guides the Council's decision making needs to give members flexibility to rapidly respond to new information and change implementation when necessary. The Council should create a program that provides guidance principles and sets aside prescriptive measures and details which hamper its ability to quickly react. A program structure like this enables the Council to use the best-available information to make its decisions. We believe that by operating in this fashion, the Council and its program would be the most effective to the region.

We wholeheartedly support the notion that dollars should go into known improvement projects, rather than funding studies and research that may or may not have a measurable impact on habitat. To date, there has been extensive RM&E done in the region that has already enabled fish and wildlife managers to understand where on-the-ground dollars can be effectively spent to impact regional fish and wildlife.

The Council's program framework should create a clear pathway for project solicitation and selection. The program has a finite budget and it is necessary that the funded projects are the ones that would provide the greatest benefits while maintaining a definitive link to the hydro system. The framework needs to prioritize the needs in the region and solicit projects that can meet these needs. Creating clear priorities for project solicitation and selection will facilitate a

difficult job for the Council and provide greater certainty that funds are being spent on projects with the greatest merit. For both PacifiCorp and for our customers, we want this program to be successful and to have clear and measurable targets by which to define that success.

Thank you for the opportunity to comment. We look forward to working with you.

Sincerely,

A handwritten signature in black ink, appearing to read "Pat Egan". The signature is fluid and cursive, with a long horizontal stroke extending to the right.

Pat Egan

Vice President, Customer and Community Affairs
