Subject: Mainstem Amendment

Mark Walker;

I am writing in opposition to the proposed mainstem amendments, as it does NOT comply with the responsibility and mandate to protect and restore salmon migration. It is imperative to maintain water levels and quality to aid in salmon migration. This point was well demonstrated in the Klamath water shed this summer.

As Mayor of the City of Kalama, Washington (on the banks of the Columbia River), I have noticed the influx of tourism to our community related to the improved salmon runs of the last couple of years. The dollars generated from sport fishing are vital to our community in this depressed economy.

I urge you to reject the proposal to that places the interests of utilities above the needs of the migrating salmon.

Thanks,

Randy Bradshaw
