

Mr. Walker,

As a family that recently relocated to Oregon for its environment and plan to live in Portland when we graduate from law school, we are very concerned about the Council's proposed Mainstem Amendments. As we're sure you've heard, they do not protect salmon and are even a step backwards. Please instead focus on more spillage and forget about the trucking. Salmon are at the core of Oregon's culture, and the State has given you a solution or at least a better plan - to protect the salmon.

Thank you,

Lou Bubala, and Jill Strawler-Bubala
