Subject: Mainstem Amendments comments

Dear Mr. Walker,

I feel very strongly that the proposal Mainstem Amendments is a step in the wrong direction. I feel it ignores what we have learned over the last 20 years.

I have seen many ideas and numbers demonstrating the ecological and economic unbalance of the Power Council's Draft Mainstem Amendments.

I feel the proposal does not weigh heavy enough the relationship between the health of salmon and the health of small communities along the river and within the region. I feel the proposal is unwise and driven by people that are not listening to science or reason or ecology or even economy. Please do not accept the Mainstem Amendments.

Yours,
Sam Beebe
