Subject: member representation and specific plans

Please send me the names and titles, as well as industry backgrounds and connections of each member of the Northwest Power Planning Council. Please write who, if any, represents, with what backing, the fishers, Indians, fish consumers, recreators, energy residential and small business customers, low- to middle-income tax payers, appropriate energy suppliers (solar, wind, etc.), and energy conservation jobs.

I, and everyone, I know want you to close the four lower dams on the Snake River, increase spill and water flow on the Snake and Columbia, stop barging/trucking salmon, increase energy conservation and efficiency, increase solar energy development and mandated use, reduce pollution and radiation poisoning, increase taxation and regulatory control and accountability of petroleum, and increase appropriate wind power and local source energy production at homes and businesses and governmental properties.

Please write what you specifically propose and promote of the above and give me your response in writing via email to [REDACTED] and/or via mail to [REDACTED].

Edith J. Gillis
