

Mark Walker  
Director of Public Affairs  
Northwest Power and Conservation Council

Dear Mr. Walker,

It seems like a no brainer to raise the targets in the 5th Power and Conservaton Plan since your recent study shows that conservation is being acquired at a rate much faster than anticipated. Please raise the bar! Hopefully this will influence BPA to be more agresive in increasing the budget to acquire more conservation.

Please revise the 5th Plan and increase the 20-year total conservation target by at least 30 percent.

Thank you

Sandra Bishop
